Work experience

November 2021 — till now	**EPAM Anywhere**
	Technologies stack: React, TypeScript, Jest/Enzyme/RTL, Less, Storybook, Git.
	Major achievements:
	– successfully managed to refactor UI library preparing it for a new architecture
	Developing and maintaining UI components library for all Anywhere products.
February 2019 — November 2021	**DeGood Studio**
	Technologies stack: SCSS, JavaScript, React, NextJS, TypeScript, React Native, Git.
	Major achievements:
	– organized convenient and fast heavy systems developing flow
	– improved user experience by making interface more flexible and fail-safe
	– deployed refactored product version that helped to lower the entry threshold for new developers
	Main focus was on developing and maintaining CRM systems for real-estate or banking guarantees. These were the projects

that have improved my skills of designing big applications, testing and refactoring.

Another direction was about creating mobile apps using React Native. It was an important experience that I was 100% interested in gaining, because I had to apply my knowledge in a new platform. Due to this, I have created such apps as Innopolis City Super-App and a platform for collective fundraising.

November 2017 — January 2019	**Hawking Bros** Technologies stack: HTML, CSS/SCSS, JavaScript, React, NextJS, Git. Major achievements: – build optimized and fast client-side of real estate database agency, enhanced user interaction with properties map by distribution of points displaying and debouncing API calls – refactored and rewrite some product components such as cart which helped to increase conversion by 50% As an outsource company we have been creating and maintaining a lot of products from simple online shops to high-load systems. While working in this position I have learnt React framework and used it to cope with business's aim to create scalable and reusable interfaces successfully. I've participated in developing applications' architecture processes, business process improvement, and team-ups to solve complicated problems.
April 2016 — October 2017	**Freelance** First experience in web development was creating simple static web sites using HTML, CSS and JavaScript as a freelancer

Education

2020	**Vladimir State University** Bachelor. Informatics and Applied Mathematics – Technical systems management.

Languages

Russian – Native
English – B2 (Upper Intermediate)

Skills

Markup	HTML5, Pug (Jade), JSX
Styles	CSS3, Less, SASS/SCSS, CSS Modules
Scripts and frameworks	JavaScript (ES6+/ESNext), TypeScript, React, React Native, Vue
Testing	Jest, Enzyme, React Testing Library
Tools	NPM/Yarn, Git (GitHub/GitLab), Figma/Photoshop
Project builders	Webpack, Gulp
Task trackers	Jira, YouTrack, Trello, Worksection
Other	Storybook, BEM, Agile (Scrum/Kanban)

About me

I am a JavaScript software engineer with over 5 years of experience specializing in ReactJS development.

My core expertise is developing cross browser, adaptive, optimized and accessible web and mobile applications. I also like to work within a team a lot.

I am highly interested in working on big, useful and complex projects that help people. I am always opened to learn something new on frontend and more.

My favorite stack: React, NextJS, TypeScript, SCSS Modules, Jest + Enzyme.

Feel free to contact me at any time!
